SUCCESS STORY

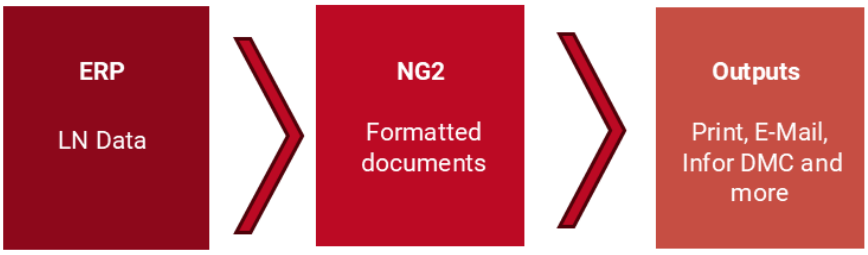
# With InterForm NG2 to next level Outputs

Precipart engineers, designs, and manufactures high precision custom solutions for the world's leading companies in the Medical, Aerospace and Industrial markets. They are originally founded in Switzerland with locations in the USA and UK.  Precipart has rich network of worldwide strategic partners**.**

The main reason to work with InterForm NG2 was the change of the ERP-system. Since Infor CloudSuite Industrial Enterprise (known as Infor LN) already worked with XML-files, the decision was clear.  The goal was to standardize documents across the company. It was one of the first installations using Infor LN & InterForm NG2 worldwide.

With the new designer software, which InterForm NG2 includes, there were endless possibilities to design the internal and external output documents and files easily. Another benefit is that the NG2 solution is Windows-, Linux- and AS/400-based. Precipart has a lot of homegrown apps and NG2 is more flexible to connect to those apps. Because of the platform independency, NG2 is very flexible to work with other systems. The new ERP-system LN generates and delivers XML-data, XML-conversion was no longer required. Precipart also uses the Inter-Excel-plugin and the UDBC-plugin for their labels.

**Precipart workflow**



**"With our experiences with InterForm NG1 we knew the change to NG2 and Infor LN was a step into the right direction. It perfectly matched our business needs."** Shahab Ishak | Solution Architect

PRECIPART

Precipart was founded as a family company in 1950, with a heritage dating back to 1846. It is located in Switzerland, the USA and UK. For five generations Precipart has maintained the highest standards of quality, safety and innovation with their precision gears & components.

InterForm

InterForm A/S was founded in 1987 and is based in Copenhagen (Denmark). With over 4000 installations worldwide every year, over 1 billion outputs are created with InterForm. We have been a partner of InterForm for over 10 years and will be happy to advise you personally.

MJR GmbH

MJR advises and supports you on all topics relating to output management. We would be happy to arrange a free consultation with you, during which you can find out about all the advantages of InterForm NG2 and our other technologies.
